

ONE PLATFORM. EVERY PLAYER. ZERO GAPS.

A PROGRAM-CONFIGURED, PROGRAM-OWNED PLATFORM FOR ROSTER MANAGEMENT & SCOUTING

College baseball programs are generating more player data than ever from TrackMan, Hawkeye, Vald, Uplift, Reboot, recruiting profiles, scouting reports, video providers, and numerous other sources. But most programs are still pulling it all together manually, toggling between disconnected systems, and hoping nothing falls through the cracks. There's a better way, and it starts with a platform built around how your staff actually works. LBi does just that.

YOUR COACHES SPEND LESS TIME FINDING INFORMATION AND MORE TIME USING IT.

When every data point on every player is already in one place, staff preparation is faster, evaluations are sharper, and nothing falls through the cracks.

YOU RECRUIT WITH CONSISTENCY INSTEAD OF INSTINCT.

Standardized scouting workflows mean every coach evaluates by the same criteria – so your program makes smarter, more defensible decisions on every prospect.

YOU OWN THE ADVANTAGE – NOT A VENDOR.

Your data belongs to your program, full stop. That means no dependency, no leverage, and no risk of losing years of player intelligence if you ever need to make a change.

THE PLATFORM GROWS AS FAST AS YOUR PROGRAM DOES.

Whether you add new tools, new data sources, or new workflows, LBi builds the connections – so you never hit a wall with software that stopped evolving.

SINGLE SOURCE OF TRUTH

Centralize bio, recruiting, statistics, TrackMan, S&C, video, and development data into one unified player profile – accessible to the right people, and nobody else.

COACH-CONFIGURED WORKFLOWS

Your coaches define how the platform works – evaluation criteria, scouting reports, recruiting workflows. LBi builds to your requirements, not a generic template.

YOUR DATA STAYS YOURS. PERIOD.

Full ownership of all player, recruit, and operational data. Export anytime. If the relationship ends, you get everything back within 30 days. No lock-in. No leverage. No surprises.

ZERO IT BURDEN

LBi handles hosting, security patches, uptime monitoring, and incident response. Your IT team stays focused on institutional priorities – not a platform they didn't choose.

SCOUTING BUILT FOR YOUR STAFF

Configure advance scouting reports, normalize stats across conferences, and build repeatable evaluation workflows that match how your coaches actually assess talent.

A PLATFORM THAT GROWS WITH YOU

Your coaches set the priorities each season – LBi builds to them. As an early-adopter partner, your program shapes the roadmap, and that includes integrations. Whether you add a new data provider or adopt a new tool, LBi builds the connection – so the platform evolves with your needs, not someone else's.

**INTEGRATED WITH THE BEST.
CUSTOMIZABLE FOR YOU.**
